0.1	R Markdown	1
0.2	Including Plots	1

0.1 R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
## [1] 0.01203298

##
## Exact binomial test
##
## data: 63 and 100
## number of successes = 63, number of trials = 100, p-value = 0.01203
## alternative hypothesis: true probability of success is not equal to 0.5
## 95 percent confidence interval:
## 0.5276484 0.7244334
## sample estimates:
## probability of success
## 0.63
```

0.2 Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
